

## MGR-01

# Rotary cutter(grass cutter/tree trimmer)

### Features

### Easy grass cutting and tree trimming by using power shovel

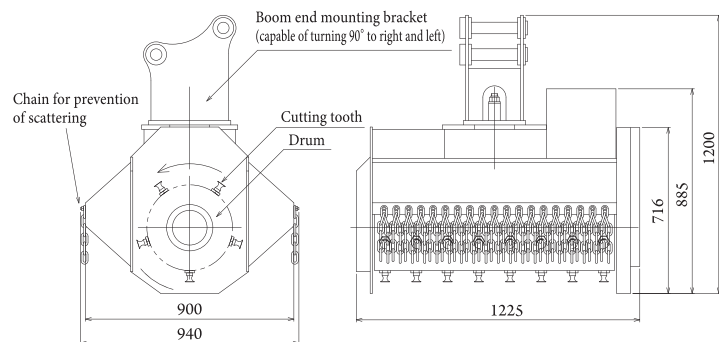

- The cutter installed on a power shovel ensures very easy and quick grass cutting and tree trimming on formation level, road shoulders and slopes.
- The special cutting teeth are used to cut weeds (lawn) and bushes (max. trunk diameter: approx. 150 mm).
- A power shovel can be used for various purposes, thereby reducing the operating time.

### Examples of work

### Major dimensions

### Principal specifications

Item	MGR-01
Specifications	
Overall length × width × height (mm)	940×1,225×1,200
Cutting height (mm)	50
Cutting width (mm)	1,000
Total weight of body (kg)	600
Number of rotations of drum (rpm)	2,000
Rotation direction of drum	Direction can be switched between forward and reverse.
Drum rotating method	Hydraulic motor (V-belt)
Required amount of oil for hydraulic motor (ℓ/min)	60
Max. working hydraulic force of hydraulic motor (kg/cm <sup>2</sup> )	210
Applicable heavy equipment	Road-rail power shovel/crane (applicable class: 0.25~0.45m <sup>3</sup> )
